WordPress Embedding Best Practices and Policies

What does *embedding* mean?

Definitions

Shortcode - Kind of like a widget in text form. Paste these into the Custom HTML widget.
Example: [foogallery id="4772"]

iframe - Raw HTML code that embeds a web page. Commonly used to embed things like Google Calendar and Google Maps. Submit a Help Desk ticket for assistance.
Example: <iframe src=”https://example.org”></iframe>

- **Embedding**
  - Videos
    Do not upload videos within WordPress. They will be removed.
    - Embed method(s)
      - Video widget
        - Add Video > Insert from URL
          - YouTube, Vimeo, and other video services should work. Give it a try.
  - FooGallery
    - Embed method(s)
      - Shortcode
  - PDF’s
    - Upload via media upload
      - Insert as in-line text
  - Web Forms
    - **Submit a Help Desk ticket before publishing a web form. IT needs to ensure that anti-spam protection is in place (reCAPTCHA).**
    - Ninja Forms

        - Embed method(s)
            - Shortcode
            - “Append a Ninja Form” option on Posts and Pages - located to the right of the editor.

- Google Maps/My Maps
    - Embed method(s)
        - iframe

- Google Drive
    - Embed method(s)
        - iframe
